

Pi4E presents

Maximize your KATA- experience

Presented by: Daixuan Huo, John Li, Muzhen Shen,
Xuanyao Qian, Ruichen Zheng

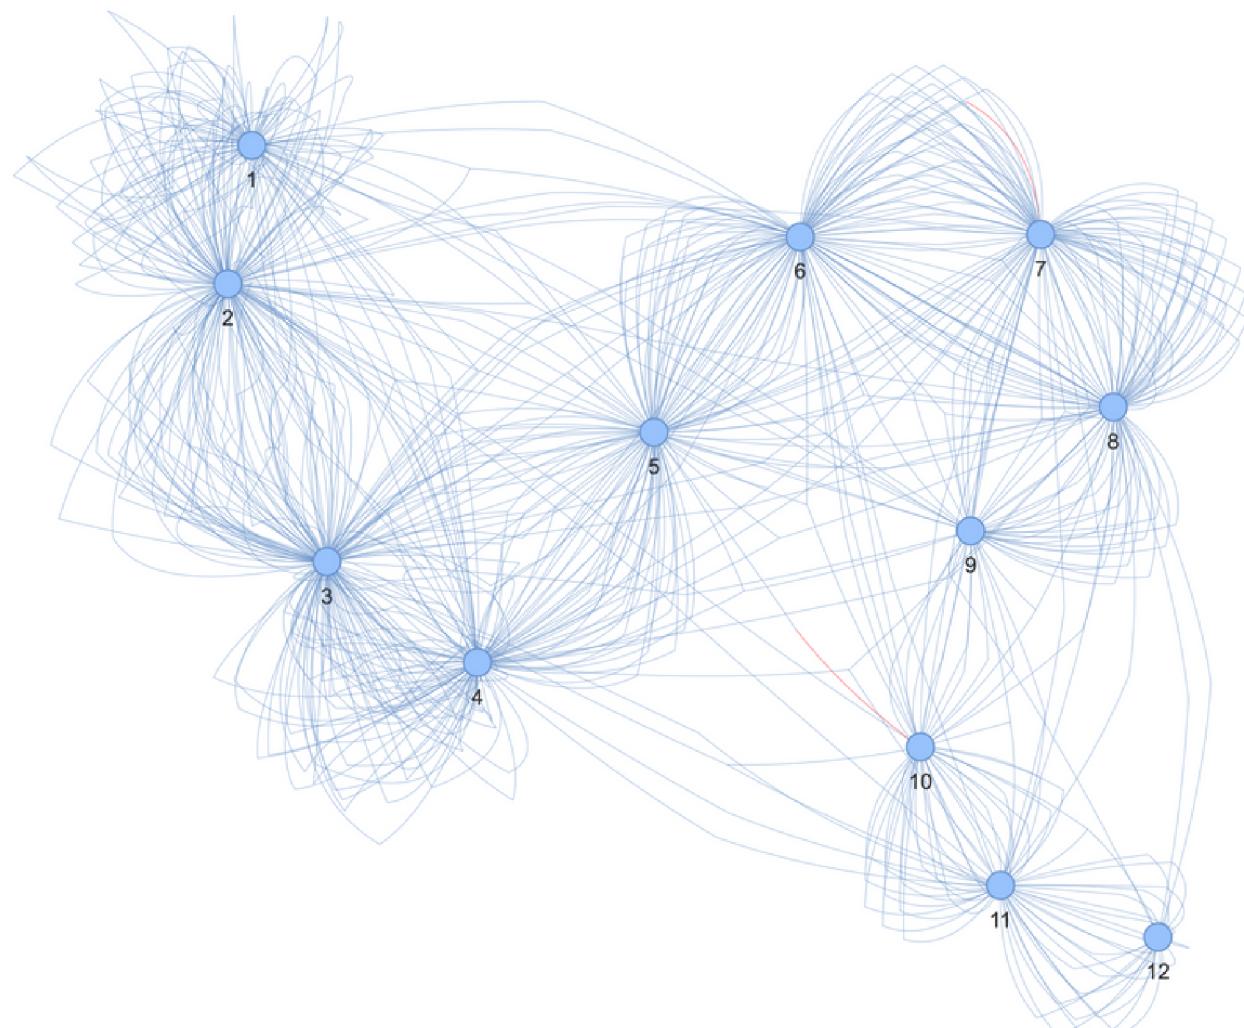

More Insight & Solutions

Observations (cont.)

- Many chapters have connections with each other as they are often viewed together in a single study session
- Course Curriculum decides chapter completion progress

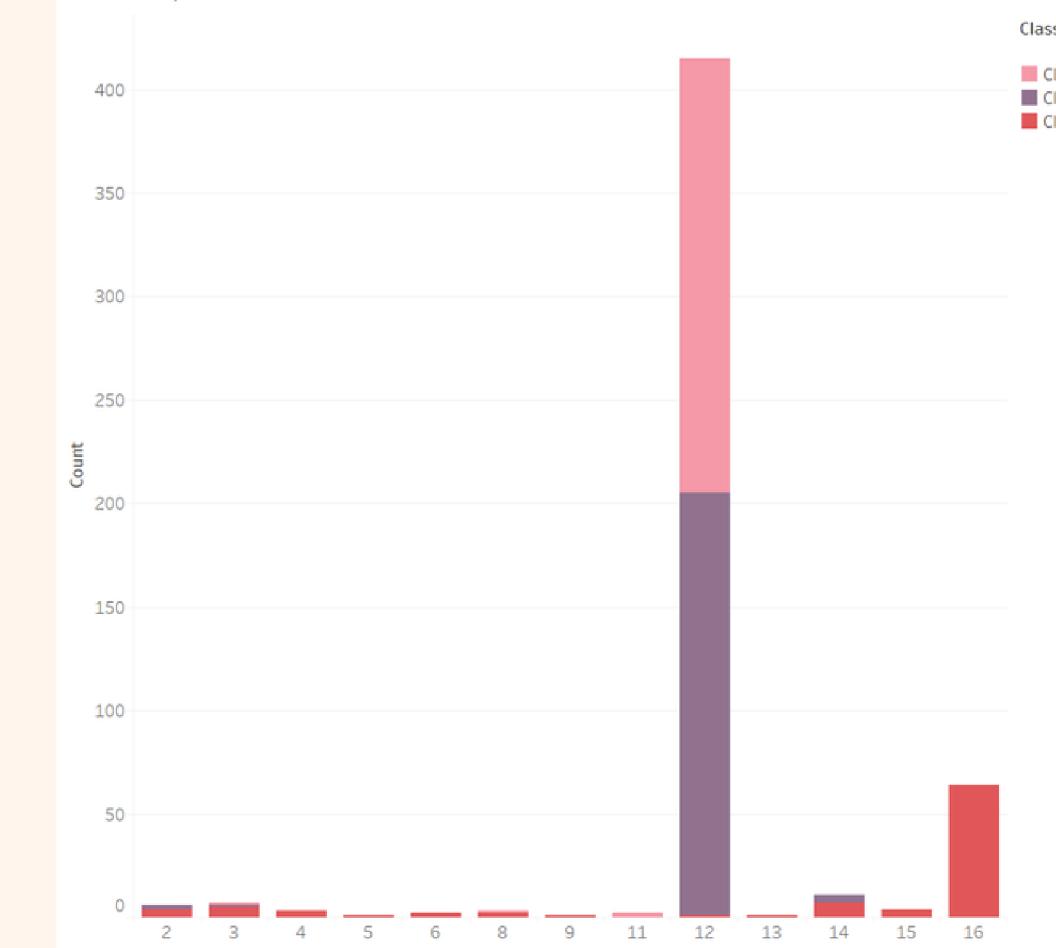

Chapters appeared in the same session

Suggestions

- Implement hints and feedback on coding problems
- Integrate AI/LLM to provide insight to the students
- Incorporate end-of-chapter evaluation questions
- Provide longer explanation in later chapters to reduce difficulty
- Provide hyperlinks directing to related early concepts for later chapter reference

Max Chapter Distribution

Article Length vs Chapter & Section
